SIGNAL PROCESSING

Cumulative contents of Volume 39

Volume 39, Nos. 1–2, September 1994

Papers

T. De Couasnon, R. Monnier and J.B. Rault
OFDM for digital TV broadcasting 1
L. Alparone, V. Cappellini and A. Garzelli
A coarse-to-fine algorithm for fast median filtering of image data with a huge number of levels 33
Y.J. Zhang and J.J. Gerbrands
Objective and quantitative segmentation evaluation and comparison 43
M.G. Strintzis
Optimal filters for the generation of multiresolution sequences 55
S.N. Jagadeesha, S.N. Sinha and D.K. Mehra
A recursive modified Gram–Schmidt algorithm based adaptive beamformer 69
S. Sunder and V. Ramachandran
Design of recursive differentiators with constant group-delay characteristics 79
L. Yaroslavsky and M. Eden
Correlational accumulation as a method for signal restoration 89
M. Bakrim, D. Aboutajdine and M. Najim
New cumulant-based approaches for non-Gaussian time-varying AR models 107
S.-C. Pei ande C.-C. Tseng
Real time cascade adaptive notch filter scheme for sinusoidal parameter estimation 117
A.K. Nandi
Blind identification for FIR systems using third order cumulants 131
B.-S. Chen and S.-C. Peng
Deconvolution filter design with consideration of channel sensitivity 149
D. Li
Finite-time-domain synthesis of linear time-variant digital filters by difference equations 167
D. Adler and S. Raz
Legal Wigner space filtering and its interpretation 179
J.A. Stark and W.J. Fitzgerald
Model-based adaptive histogram equalization 193
S.R.M.F. Aguiar and A. Alcaim
Backward adaptive lattice and transversal predictors in low-delay CELP coders 201

Short communication

S.S. Nikolaidis, S. Theodoridis and C.E. Goutis
Array processor for block adaptive LS FIR filtering 215

Elsevier Science B.V.

Volume 39, No. 3, September 1994

Papers

N. Kannan and D. Kundu
On modified EVLP and ML methods for estimating superimposed exponential signals 223
Z. Ren and H. Schütze
A stabilized fast transversal filters algorithm for recursive least squares adaptive filtering 235
B. Kumar, S.C. Dutta Roy and S. Sabharwal
Interrelations between the coefficients of FIR digital differentiators and other FIR filters and a versatile multifunction configuration 247
D.X. Sun, L. Deng and C.F.J Wu
State-dependent time warping in the trended hidden Markov model 263
J. Ängeby, P. Stoica and T. Söderström
Asymptotic statistical analysis of autoregressive frequency estimates 277
L. Cheded and P.A. Payne
The exact impact of amplitude quantization on multi-dimensional, high-order moments estimation 293
J.M. Morris and H. Xie
Fast algorithms for generalized discrete Gabor expansion 317
F. Argenti, V. Cappellini, G. Benelli and A.N. Venetsanopoulos
IIR implementation of piecewise polynomial wavelet representation with application to image coding 333

Thesis alert 347

Announcement and call for papers 349

Planning of congresses and significant events 351

Author index of Volume 39 353
